# SMOOTH OUT THE TOUGHEST ROADS

At Load Trail, we are committed to providing only the best, premium quality components on the market for our trailers. That's why the Dexter Heavy Duty Suspension System is standard on every Load Trail with 10,000 - 16,000 lb axle configurations. Just like a Load Trail, this suspension system is built tough to work as hard as you do. It is built to be balanced, easily adjusted, and withstand heavy loads.

**HDSS**™  
SUSPENSION SYSTEM

▶ Provides the ability for axle alignment through the adjustable trailing rods reducing dog tracking and increasing tire life.

▶ Double slipper springs for better tracking and less maintenance.

▶ 5-year limited warranty on suspension system combined with original Dexter axles.

▶ Heavy duty mechanical suspension designed for axles from 10,000 to 25,000 lbs. in tandem sets.

▶ Heavy duty hangers and equalizers are made from high yield fabricated light weight steel resulting in a lighter more durable trailer suspension.

▶ Industry standard 49.00" axle spacing provides better load balance and trailer stability.

▶ Extended life equalizer bushing leads to lower maintenance time and cost.
