N20-1
DEC

Trailer bought new from AllenDale Trailers in Red Deer in spring 2007. Bought Kubota light plant new from Red Deer Kubota at same time and installed it in trailer.

Incinolet installed at this time also. It was replaced with new one in 2010.

Very few miles on trailer, used on location to power up to 3 wellsite units 24 hrs a day. Light plant was always well maintained.

Owner retired from so unit has not been used much since 2012.

NOTE: MAIN POWER SWITCH BEHIND PANELS ON RIGHT SIDE OF GENERATOR
