1 CHECK ENGINE LIGHT

Performed download and found active turbo speed codes logged. Tested speed sensor resistance and its within spec. Tested sensor voltage from ecm and found no 5v. Removed harness from behind the oil filter to inspect - had to cut back the loom and found damaged wiring. Repaired harness and then retested - found no 5v supply. Removed ecm connector and tested voltage at ecm pins 5v found. Checked ecm pin drag - all pins are tight. Customer wanted to replace harness now. Replaced engine harness. Unit had intake nox sensor fault also. Checked voltage and resistance on engine harness all in spec. Replaced intake nox sensor. Unit also had dpf faults logged and black stacks. Removed dpf step assembly and bracket to access dpf. Disassembled dpf and found it breeched but doc is still good. Blew out doc and cleaned all mounting surfaces and assembled new dpf. Had to replace the dpf differential pressure sensor and tubes as all the tubes broke off. Once dpf was together, cleaned the stacks, reset all dpf filters in inside and performed regen on unit. No faults returned. Cleared all codes

Terms and Conditions:

Repair Acknowledgment: I, the undersigned owner or representative, acknowledge the indebtedness related to the repair and service work listed above, along with the purchase and installation of any necessary parts and materials. I confirm I have the authority to bind the owner.

Payment Terms: Payment for repairs are due upon receipt of unit unless charged to customer's account. Payment of account is due in full by the 15th day of the month following the statement date. Unpaid balances will be charged interest of 2% per month compounded monthly (26.82% per annum).

Garage Keepers Lien: By signing below you acknowledge and agree that the vehicle described above is subject to a Garage Keepers' Lien in favor of Stahl Peterbilt Inc., for the full dollar amount of repairs, parts, accessories, materials, and services provided by Stahl Peterbilt Inc., as permitted under the Garage Keepers' Lien Act (Alberta), as amended from time to time.

Warranty Considerations: Stahl Peterbilt Inc. will submit a warranty claim to the manufacturer for any portion of this repair that is designated for warranty considerations. If the manufacturer rejects the claim or a portion of the claim, the owner shall pay that portion which is rejected in accordance with the Payment Terms set out above.

Warranty Limitation: Subject to the requirement below, all repair and services carry a 30 day warranty from the date Stahl Peterbilt Inc. completed the work. The owner must advise Stahl Peterbilt Inc. of any warranty claim within 5 days of the failure date. Certain Parts, products, accessories, materials, and other items used in completing the repair and service work may be manufactured and supplied by third parties. The quality and workmanship of such items are entirely outside the control of Stahl Peterbilt Inc. and Stahl Peterbilt Inc. makes no warranties, whether expressed, implied, statutory, or otherwise, including any warranty of merchantability or of fitness for a particular purpose with respect to such items.

Responsibility for Vehicle and Contents: Stahl Peterbilt Inc. is not responsible for loss or damage to the vehicle, or to articles left in vehicles, in case of fire, theft, vandalism, or accident.

- 1 CHECK ENGINE LIGHT ON - DEF PUMP
Performed download, opened eds case for 1682, checked for any related faults - none found. Inspected def system for any damage or crystal build up - all ok. Used insite and tried to run def leak test - pump runs but no pressure built. Def tank level is full. Removed the def suction line and blew air through the line - its free and clear. Reconnected to tank and pressured up a bit with air and had def coming out suction line. Performed suction test on def pump and it failed @ 0 inhg. Removed the fitting on inlet to pump - no debris or blockage found. Failed pump detected. Replaced def pump, removed electrical, def line, and coolant line to pump. Mounted new pump and hooked up all plumbing and electrical. Primed pump and performed def leak test again and you can hear the pump prime but not reading on def pressure on insite. Removed dpf step assembly to access the def valve, removed the pressure line and found lots of def in line and flowing. Put gauge in pressure line and measured at 130psi. Def valve is not reading. Replaced def dosing valve and ran leak test after repair - 130psi reading and no def leaks. Tied up all harnesses and lines

step, mounting bracket to frame for access. Removed temp sensors and differential pressure tubes - had to heat them cause they were seized. Disassembled doc - no face plugging on inlet. Removed sensor brackets on dpf and removed clamps from dpf. Clamps were seized as well had to cut them off. Removed breached dpf. Cleaned all surfaces, pneumatically cleaned doc and inspected for cracks - all ok. Mounted new dpf and cleaned doc with gaskets and clamps - torqued to spec. Reinstalled all sensors in doc and dpf along with the diff pressure tubes. Reinstalled step brackets and step assembly cover. Performed dpf reset and performed regen on unit to make sure no exhaust leaks or further issues. No faults returned.
