## **FABBRO DIESEL SERVICES WARRANTY**

### **On externally purchased parts**

In light of more frequent parts failures from majority of local suppliers; Fabbro Diesel Services will be unable to supply replacement labour on any parts supplied by customers from local suppliers. Most mainstream equipment manufactures, and aftermarket parts suppliers will predominately not supply any compensation for Fabbro Diesel Services' fitting labour even though their component was at fault. For over a decade FDS has written this lose off as FDS Policy. Unfortunately, this is a cost that FDS is no longer able to absorb moving forward.

#### **Example:**

Customer supplies a recon head – fitting takes 25 hours. Component fails and customer is given recon head and gasket to complete repair at FDS by the manufacture/parts supplier. FDS completes repair, sends customer second labour bill which will need to be taken up with original parts supplier.

Please note all parts purchased through FDS direct are exempt from this procedure and are covered if conditions fall under FDS warranty policy.

Fabbro Diesel Services or any of its subsidiaries, warrants the following products sold be it to be free from defects in material and workmanship:

- New parts and assembled components
- Reman parts, assembled components

#### **Responsibilities**

If a defect in material or workmanship is found during the warranty period, FDS will, during normal working hours and at a place of business of an FDS workshop or elsewhere approved by Russell Fabbro:

- Provide (at FDS choice) New reman parts or FDS approved repaired parts, assembled components, needed to correct the defect.

**NOTE:** New remanufactured, or FDS approved repaired parts or assembled components provided under the terms of this warranty are warranted for the remainder of the warranty period applicable to the parts or assembled components being replaced as if such parts or assembled components were the original parts or assembled components. Items replaced under this warranty become the property of FDS.

Replaced lubricating oil, filters, antifreeze, and other service items made unusable by the defect.

For all other products covered by this warranty: Provide reasonable and customary repair labour needed to correct the defect if product found to be defective and its replacement are both installed by FDS or other source approved by Russell Fabbro; excluding labour to disconnect and reconnect generator sets, engines, or transmissions to attached equipment or mounting and support systems not sold by FDS.

#### **User Responsibilities**

The user is responsible for:

- Providing proof of sale date to the first user
- Providing proof of date of installation
- Transportation costs
- Premium or overtime labour costs
- Parts shipping charges in excess of those that are usual and customary
- Costs to investigate complaints, unless the problem is caused by a defect in FDS material or workmanship
- Giving timely notice of a warrantable failure and promptly making the product available for repair
- Performance of the required maintenance (including use of proper fuel, oil, lubricants, and coolant) and replacement of items due to normal wear and tear.
- Allowing FDS access to all electronically stored data

#### **Limitations**

FDS is not responsible for:

- Failures resulting from any use or installation that FDS judges improper
- Failures resulting from attachments accessory items, and parts not sold by FDS
- Failures resulting from abuse, neglect, and/or improper storage or repair, including installation of parts and assembled components in contaminated systems
- Failures resulting from user's delay in making the product available after being notified of a potential product problem

Failures resulting from unauthorized repair or adjustments and unauthorized fuel-setting changes not performed by FDS.

#### **APENDIX A**

Warranty period – 6 months or 1000kms for PARTS

Warranty period on workmanship – 6 months for LABOUR

#### **APENDIX B**

Equipment that is serviced and maintained for 80% of its working life of Agreed Contract Maintenance may be subject to 12 months or 200 hours parts and labour warranty upon request.
