

Vehicle Information:

Make/Model: Freightliner Cascadia 2012 **126**

Odometer: 1,323,000 miles

Engine: Detroit Diesel DD15

Transmission: 10-Speed Manual

VIN: 1FUJGLDR6CSBC7457

Condition: Inoperable

Ownership & Service History:

Purchased in 2015 with 263,000 miles - operated by the same owner-operator until now with timely preventative maintenance

In October 2022 (at 1,070,000 miles), the engine was replaced with a new one from the Freightliner factory in Michigan.

In January 2025, after 251,000 miles on the new engine, the truck experienced an engine issue and the engine was rebuilt.

In May 2025, after only 27,000 miles since the rebuild, the truck broke down again with another engine problem. The shop has diagnosed the issue as a crankshaft bearing failure — a component that was replaced during the rebuild.

Major Repairs History

OCT 2022 - Engine Replacement

AUG 2023 - Differential replacement (Weller Truck Parts' brand)

SEP 2023 - Valve adjustment

APR 2024 - Transmission Replacement

JAN 2025 - New Turbo, New Injectors
