		transmission mount through bolt. Removed transmission mount bolts. Raised vehicle on hoist. Removed splash shields. Removed transaxle oil drain plug and drain oil. Removed both axle halfshafts. Removed PTU. Supported engine with a screw jack and the transmission with a transmission jack. Removed bell housing dust cover. Removed four modular clutch-to-drive plate bolts. While removing bolts, one tight-tolerance (slotted) drive plate hole will be encountered. When this bolt is removed, mark drive plate and modular clutch assembly at this location. Be sure to align marks upon reassembly. Removed front transmission mount through bolt. Removed transmission crossmember mounting bolts. Removed transmission crossmember. Removed rear transmission through bolt. Removed rear transmission mount bolts and mount from the frame. Removed rear transmission mount bracket bolts and bracket from transmission. Removed remaining transmission bell housing bolts. Carefully lower engine and transaxle on screw jack and transmission jack until proper removal clearance is obtained. Removed transaxle and engine support bracket from vehicle.
