Checked fuel tank levels and both are 3/4 full. Tested for air in fuel, connected test hose, ran in bucket and there are no bubbles present. Performed injector return flow test which measured 50ml - pass. Performed rail release value test - no drops come from valve. Reassembled and pulled fuel pump head and found it plugged and tappets stuck. Assembled fuel pump with new tappers, cam was still good in the pump. Torqued pump head down and hooked up fuel lines with new washers. Assembled power steering pump with new gasket. Primed fuel system and ran up checked for leaks. Cleared faults.	4,914.46	1.00	4,914.46
