GASKET KIT , TURBOCHARGER FORD 6.7L 11-14 Pickups 11-15 Cab/Chasis				
2011 Ford F350				
KM: 293728				

Troubleshoot leak at turbo, customer said we did turbo previously.

-Looked through invoices and did not see any turbo replacement that NAPC performed.

-Can see turbo leaking into valley and running down engine, removed intake and can see turbo is leaking from centre section

-Checked blow by from engine and appears normal at this moment, requires turbo replacement. Confirmed turbo is original turbo from truck and has not been replaced.

-Recommended 2017+ Ford 6.7L Turbo upgrade for reliability reasons as 11-14 factory turbos are prone to compressor wheel failure.

Customer would like to stay with 11-14 factory turbo.

-Installed rebuilt turbo with new gaskets and seals.

-Test drove and turbo is working as intended and do not see any oil leaking. Cleaned the valley as much as possible to get rid of old oil leak.
