Complaint: Concern of blue smoke

Cause: Failed Injection pumps

Labor

Correction:

Fuel System / Injectors / Confirmed customers concern, found unit smoked a lot upon start up

Found unit smoking and misfiring Checked exhaust with thermal camera Found cylinder 1 and 2 not producing heat Cut out injectors, found 1 and 2 made no difference

Removed injection pump 1 and 2 Found Injection pump 1 fell apart inside

Removed all parts that fell inside Installed 2 test injection pumps Reinstalled all components

Ran unit - found unit runs smooth and no smoke

Noticed oil leak from front of unit - will clean off and recheck if current during load bank

Advise to replace both unit pumps - Customer approved Advise to perform valve set - Customer approved Advise to perform load bank and check for leaks - Customer approved

Noticed oil leak from front - possible front seal

Removed injector lines Removed return lines Removed test pumps installed new pumps

Reinstalled all ramoved components Job complete. - Completed: 12/2/2024
