WORK PERFORMED

01 Look over engine in unit Loose engine

SCOPE OF WORK

Engine not complete and not set up for this application, researched and sourced many missing components, had to remove pump, adapter and flywheel to get part numbers for cummins to help find starter and fuel pump. Local xcmg dealers were not able to supply all parts and there was many parts that cummins would have supplied but having no original esn made identifying these parts difficult. Went and looked at some other xcmg excavators to help identify some of the missing components.
