Work Requested:

1. Service call: Injector issues on Tigercat processor.

Work Completed:

1. Responded to service call, connected with scan tool and monitored fuel pressure, found it would not build fuel pressure.

Capped off injectors one at a time and found most injectors seem to be bleeding down at different rates.

Only had 2 injectors along, found #2 and #4 were the worst with #1, #3 and #5 also showing issues.

Removed valve cover, rockers and R&R injectors 2 and 4.

Reassembled and ran to test - Good.

Ordered 3 more injectors for install at a later date and advised customer to monitor starting issues.
