REPAIR RAD DOOR TO SEAL

CAUSE:

the rad door seals were damaged and plugged in the pivot area the rads were also plugged with a lot of chaff

CORRECTION:

with the rotary screens removed unbolted the condenser and removed form the door
use crane to support the rad door and unbolt from the combine
lower rad door out of the way
remove old rad door seal clean the rust from the seal mount on the rad housing clean out all the chaff that build up in the rad door mount
install new seal on the rad housing,
mount the rad door but when the door was on the combine initially the seal was not properly sealing in the bottom corner of the door/.
with the door hooked to the crane adjusted the door where it was mounted to and try and get the rad door to sit properly and seal all the way around, this took a bit time but very important.
when i finally got the door seated adjusted the clamps on the door.
reattach the condenser and bolt up everything and repair was completed.

unhook wiring from the hyd drive motor remove the nuts holding the motor on, support motor on jackstand and pry the motor out of the transmission and back and away remove trans cover and unhook all wiring and brake lines remove drive shafts
get tranny jack and support the tranny
unbolt the tranny and lower
jack up combine and remove tranny out from underneath the combine
remove top cover on the trans and look for were the chunks were coming from, damage was enough to put in the new trans.
new tranny showed up swapped the motor mount bolts removed the lower brake calipers to swap the brake lines onto the new tranny and reinstall
put tranny ontop the jack and rolled under the combine, was jacking the tranny up into place but the jack had leaked oil and would not go up far enough.
lowered the tranny and removed from under the combine lifted the tranny off the jack flipped jack over and refilled the resevoir,
put tranny back on rolled under and jacked the transmission up into place
installed spacers and mount bolts
install hyd drive motor hook up all electrical.
install brake lines and park brake hyd line
install drive shafts
replace the transmission speed sensor as it was the wrong one installed electrical plugs didnt match.
fill trans with oil

R&R TOP SHAFT RPM SENSOR

CUSTO COMPLAINT

R&R TOP SHAFT RPM SENSOR

CAUSE:

the top shaft rpm sensor was damaged, when removing the pickup sensor wheel

CORRECTION:

found the top shaft is not properly installed in the feeder and is over to one side a 1/4 not allowing the sensor pickup wheel to sit centered on the top shaft, without taking the feeder off and loosening everything to get the top shaft properly, used jb weld to center the inner washer of the pickup wheel into the pickup and then bolted it into the end of the top shaft so the sensor wheel couldnt move around freely. remove and replace damaged rpm sensor.

I hereby authorize the above work to be done along with the use of necessary materials. I agree that Redhead Equipment may access and utilize any electronic data stored or available on the machine, including remote access, for the purpose of diagnosing, repairing or servicing the machine or its components. You and your employees may operate above machine for purposes of inspection, testing or delivery at my risk. I agree to pay cash prior to redelivery of machine or on terms satisfactory with you until paid in full. A commercial lien is acknowledged on above machine to secure the amount of repairs thereto. It is understood that this company assumes no responsibility for loss or damage by theft or fire to machines placed with them for storage, sale, repair or while field testing. Special order and electrical parts are not returnable. Any stocking parts returned after 30 days will be subject to a 15% restocking charge. We cannot accept any part returns on weekends or after hours. Part returns not accepted after one year from original invoice date. All returns require original invoice and packaging. No title passes on purchased units until the applicable invoice is paid in full. 2% per month charge on all overdue accounts (24% per annum). Parts & Service are net 30. Whole goods and rental payments are due on delivery.

R&R FEEDER JACKSHAFT

CAUSE:

feeder jackshaft bearings were rough and the sprockets were loose on the shaft

CORRECTION:

remove the jackshaft mount
remove sprocket
remove and replace bearings on the shaft
install the sprocket and tighten
with the top shaft being misaligned it was tough to be able to get the sprocket in the correct spot so the chains run straight, bolt the jackshaft back onto the feeder hook up chains and tension.
