Recall #: T79 | BRAKE TRANSMISSION SHIFT INTERLOCK Recall Date: 2018 Jan 04

Recall Description

The Brake Transmission Shift Interlock (BTSI) locking pin may become stuck in the open position. A BTSI locking pin stuck in the open position may allow the transmission to be shifted out of PARK and to or from any gear position without depression of the brake pedal and/or without the key in the ignition, if a key is applicable.

Remedy

For 2013-2017 model year; Inspect the Brake Transmission Shift Interlock (BTSI) operation and replace if necessary. The Body Control Module (BCM) software will also be updated. For 2009-2012 model year; replace the BTSI, BCM software update not applicable.

Recall #: U61 | REPROGRAM POWERTRAIN CONTROL MODULE Recall Date: 2018 Jun 26

Recall Description

The fault handling strategy of the Engine Control Module (ECM) or PCM software in the affected vehicles does not remove positive torque requests from the engine controller if the CAN-C bus stops communicating while the cruise control is requesting positive torque.

Remedy

Inspect the software level of the ECM/PCM and, if necessary, perform a software flash on the ECM/PCM of affected vehicles to improve the fault handling so that if the CAN-C bus does stop communicating any active torque requests will be cleared

Recall #: U74 | 2015 - 2017 TAILGATE LATCH Recall Date: 2018 Aug 03

Recall Description

The tailgate actuator limiter tab within the power lock actuatory control assembly may fracture allowing the lock rod control bracket to over-travel which may pull the lock rods and release the latches, potentially resulting in the tailgate inadvertently falling open at any time

Remedy

The remedy for this item will limit the locking actuator travel and not allow the pivot arm from overtraveling and pulling on the locking/unlocking rods

Recall Description

Some vehicles may have been built with an outboard steering linkage jam nut that could loosen allowing one end of the drag link to separate from the adjuster sleeve.

Remedy

Inspect the torque values. If the torque values meet requirement, the nuts will be welded to the adjuster sleeve. If the torque values do not meet requirement, the drag link assembly will be replaced.

ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim. In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at http://apps.icbc.com/registration/vchr/Limitation.html.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.
